

Reference letter

To whom may concern,

“GLOBAL INDUSTRIAL PROJECT” LLC had performed works on modernization of pipe handling lines at Welspun factory, Little Rock, USA under Contract with Turn Key Pipeline Services BV in the year 2014.

As part of the contract works on replacement of unstable working parts in rainy weather laser range finders were replaced by encoders with PROFIBUS interface. Electrical works, commissioning, updating the SIEMENS controller program services were performed. All the works have been accomplished in a professional manner, and in time.

Turn Key Pipeline Services BV recommends «GLOBAL INDUSTRIAL PROJECT” as a reliable, conscientious and professional partner.
