

## Reference letter

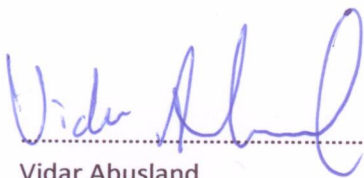

"Global Industrial Project" LLC has performed works on upgrade of automated process control system for concrete weight coating line of large diameter pipes in a complex with commissioning services at the production facility for Wasco located in Mo I Rana, Norway. The set of works was accomplished in the year 2014-2015 under the Contract with Wasco Coatings Norway AS.

For this project «G.I.P.» LLC has carried out the following works:

- Design, program and upgrade of software for PLC;
- Upgrade of visual display system;
- Complex of works on commissioning, supervising, and start-up of the equipment;
- Development product traceability system;
- Constant facility maintenance service by means of our engineers

All the works have been performed according to the schedule and with high professionalism. All the specific Wasco Coatings Norway AS requirements were taken into account.

Based on the above mentioned we can recommend «G.I.P.» LLC as a reliable partner capable to perform complicated technical tasks in the field of automation.
